

# ▶ HOW CMI'S SD-WAN ENABLE QUALITY CONNECTIVITY AND SEAMLESS DEPLOYMENT

## CASE STUDY

---

A European retail enterprise headquarter in France, with branches located in China and Asia Pacific, requires efficient data transmission between different regions of the world

## Challenges Encountered

- ❗ High costs to connect multiple branches between regions with traditional connectivity services.
- ❗ Long construction period for international leased-line.
- ❗ Do not have the ability to proactively operate and maintain the services.

## After adopting CMI's SD-WAN

- ✔️ Swift & Flexible Deployment – Last-mile internet access with zero-touch provisioning for seamless deployment.
- ✔️ Optimize network visibility and monitoring through a centralized management and monitoring platform.
- ✔️ Enhance connection speed through global SD-WAN gateway around the world.
- ✔️ Enable multi-network access between the headquarters and subsidiaries for any cross-regional and cross-border businesses.

## Cloud Network Products Free Trial

Enterprise customers can access premium cloud-network products for **up to 30-day** free trials\*, while new users can enjoy extra **USD 500** cloud service voucher<sup>^</sup>. (Additional USD 200 cloud voucher will be given to new public cloud account registration through CMI mCloud portal.)

\* Applicable to Cloud Connect, SD-WAN, Application Acceleration Network, Multi-Cloud Services, Cloud-based Applications / Professional Cloud Services.

<sup>^</sup> Applicable to AWS (Global), Alibaba Cloud (International), HUAWEI CLOUD (International), Microsoft Azure (Global), Google Cloud, Tencent Cloud, IBM Cloud
